SALES TAX COLLECTIONS (by Fiscal Year - In Thousands)

The 1% general sales tax received by the Village represents the General Fund's single largest revenue source, making up 20% of projected revenues for FY10/11. Growth in this revenue has been slow, at about 9% over the 10 year period shown, however has remained stable during the deep economic downturn of the past few years. This is largely due to a fairly heavy reliance on goods which are demand inelastic in nature (groceries and everyday needs). This is illustrated more clearly on the next page.
