# SNOW MANAGEMENT IN THE CENTRAL BUSINESS DISTRICT

The snow season is upon us and with it the challenge of snow removal from the Central Business District (CBD). Public Works recognizes the importance of providing timely snow removal service and works hard to clear the streets, parking areas and sidewalks to your satisfaction.

This brochure will help outline the practices followed by the Village's snow management team which may have an impact on the public parking available for your business patrons and pedestrian access on public sidewalks and roads.

Questions or comments?

Moving snow quickly from roads and public sidewalks can be a challenge!

Call Public Works at (630) 469-6756 between 7:00 a.m. and 3:30 p.m. or call the Snow Line at (630) 858-**SNOW** anytime during a snow event!

## Snow Removal from Sidewalks in the CBD:

When snow has fallen to a depth of 3 or more inches, Public Works staff will clear a 4-foot wide path on all the CBD sidewalks—**clearing the remaining snow on the walk is the responsibility of the property owner.**

When snow totals are less than 3 inches, property owners are responsible for snow removal in front of their building.

In addition, Public Works staff will remove snow on any sidewalk where the Village owns the adjacent property; this will be done regardless of the depth of the snowfall.

## Snow Removal from Street and Parking Facilities in the CBD

The map on the back of this brochure outlines the street and parking facilities in the CBD that are cleared of snow by the Public Works Department. Snow may be plowed from street and parking

areas into the center of the street creating windrows. Openings are left for access to parking facilities, driveways and pedestrian crosswalks. The snow is then loaded onto trucks with a snow-thrower and hauled away. An alternative method involves piling snow into select parking stalls and using front end loaders to transfer snow into trucks for disposal. During a large snowfall, snow will be cleared from the roads during normal business hours. The

Removing snow overnight after snow has stopped falling is the preferred

Police Department will block a section of street off to all vehicles until it has been cleared of snow and then

move to another section until all streets are clear of snow.

Removal of snow overnight after the snow has stopped is the preferred method as vehicular and pedestrian traffic is at a minimum.

Our goal is to have all snow removed within 12 hours after snow has stopped falling.
