V. ENTERPRISE FUNDS

Enterprise Funds are used to account for operations that are financed and operated in a manner similar to a private business enterprise where the intent is that the costs of providing goods or services to the general public be financed or recovered primarily through user charges; or where it has been decided that periodic determination of revenues earned, expenses incurred and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purpose. The Village has four Enterprise Funds.

Water and Sewer Fund.....	5-2
Village Links / Reserve 22	5-28
Parking Fund	5-65
Residential Solid Waste Fund	5-69

WATER AND SEWER FUND

The Utilities Division is responsible for the operation and maintenance of the Village's water distribution system, two pressure adjusting stations, two pumping stations, two underground storage reservoirs, two ground water wells and two elevated water towers. In addition, the division maintains the sanitary sewer collection systems, five sanitary sewer lift stations, and the storm water conveyance system. The storm sewer conveyance system and the sanitary sewer collection system are two separate standalone systems each requiring specialized independent maintenance. The Village has 7,974 residential water services, 424 commercial water services, and 64 governmental water services for a total of 8,462 active utility billing addresses, of which 26 are for properties outside of the Village limits. Duties include: monitoring the distribution and storage of potable water and associated regulatory reporting requirements; repair of water mains, valves, hydrants, customer water service lines and valve boxes located in the public right-of-way; hydrant flow testing; water valve exercising; water meter installation, repair and testing; water quality testing; water and sewer utility structure repairs; sanitary sewer lift station maintenance; and sanitary/storm sewer system cleaning and televising. Additional duties include responding to resident requests for service and assistance.

Water Production, Pumping, Storage, and Distribution System

- Two pressure adjusting stations located where Glen Ellyn receives Lake Michigan water from the DuPage Water Commission.
- Two 1,000,000 gallon ground storage reservoirs and two elevated storage tanks of 500,000 and 750,000 gallon capacity.
- Two stand-by ground water wells and two water pumping stations.
- Approximately 110 miles of water mains; ~1,300 fire hydrants; and ~1,600 main line valves
- Oversee compliance program of 2,200+ Cross Control Connection devices.
- Supervisory Control and Data Acquisition (SCADA) monitoring and control system.

Sanitary Sewer System

- ~85 miles of sanitary sewer mains.
- 5 sanitary sewer lift stations. (Glen Oak {Hill Ave} annexed from Lombard late '17/early '18)
- 2,000+ manholes.

Storm Sewer System

- ~70 miles of storm sewer mains.
- 3,100+ storm sewer inlets and catch basins.
- 1,200+ storm sewer manholes.

Division Accomplishments for FY17

1. Current non-revenue water loss for the Village was down 1% from the previous year to 11.5%, meeting current targets set by the IDNR. With continued efforts by the division, staff expects to meet the 2019 IDNR goal of <10% non-revenue water.
2. Newton Water Tower had the inside of the tower painted as part of the ongoing maintenance program keep this asset in top condition indefinitely.
3. Wilson Reservoir was drained, cleaned and professionally inspected.

4. Created a cost share program to help address problematic sump pumps that cause issues in the right-of-way (ice buildup, slippery/muddy conditions, flooding) to assist homeowners in rectifying the situation.
5. Replaced the roof of the North Pressure Adjusting Station (N PAS). Replaced the windows of the Newton Pumping Station and upgraded security system for those windows.
6. Completed the Newton Pump Station Motor Control upgrades including new electrical panels, soft start motors and better integration with SCADA.
7. Worked to bring the Glen Oak lift station (Hill Ave.) onto the Village SCADA system after annexation from Lombard (in late 2017/early 2018).
8. Cleaned the 5 vortex separator locations around the Lake Ellyn/Riford road storm sewer system, performed in-house this year. These separators help remove garbage and debris from stormwater flows, keeping Lake Ellyn and the downstream waterways cleaner.
9. Drained and cleaned all four lift station wet wells and continued bacterial treatment for fats, oils and grease (F.O.G.) to help control buildup at the lift stations and in the pipes. Reduced the amount of chemicals used to treat for F.O.G. in half by adding a third cleaning cycle to the sanitary lines that have known grease issues, a savings of over \$10,000.
10. Met all state and federal drinking water regulatory requirements and reporting. This year on the water distribution system we pulled routine bacteria samples at a rate of 30 per month, collected all required new construction bacteria samples and collected water main break samples as needed. On the two emergency back-up wells we performed monthly bacteria samples and quarterly tests for volatile organic compounds, synthetic organic compounds, inorganic chemicals, nitrates/nitrites and radionuclide.
11. 2017 was the year for performing the triennial lead and copper sampling required by the IEPA. All test results for lead came in below the IEPA action level of 15 parts per billion (ppb), with a range from non-detect (0ppb) to a high of 3.82ppb for lead. All copper tests also came in below the IEPA action level of 1.3 parts per million (ppm), with a range from non-detect to .381ppm.
12. Acted as liaison between the Village and a contracted program administrator for the Cross Connection Control Program, overseeing 2,200+ devices. Compliance stands at 74% with the required annual testing for RPZs. Percent compliant fluctuates, as required testing dates are based on individual location and may be due during any time of the year. The IEPA required biennial survey will go out again in 2018 that should help raise compliance towards 100%, with the Village working with the contractor towards this goal.
13. Completed the annual flushing and inspection program of the approximately 1,300 hydrants. All dead end hydrants were flushed an additional time at the end of summer to help maintain water system quality.
14. A leak survey of the water distribution system was performed in-house, listening on all ~1400 hydrants (Village owned and private) to look for water loss that was not surfacing. This survey was started in July and was completed in 4 weeks. The survey found 7 leaks, 6 of which were on hydrants that needed to be repaired or replaced and 1 leak associated with rotted bolts on a

mechanical joint. The total water loss over 1 year for these 7 leaks is estimated to be between 1.8 and 3.6 million gallons, with the assumption that each leak was between 1/2-1 gallon per minute, if the leaks were not found and repaired. Total cost for this in-house survey was \$2,759, compared to the \$14,490 spent in 2016 for a contractor, which found 10 leaks at hydrants, 1 leak at a service saddle and 1 leaking water service.

15. Meter testing – All 3” and larger meters were tested in place by a contractor over the last two years, making any repairs or replacements as needed. Residential meters that have been removed for upgrades or demolitions continue to be inspected in-house, with the average results testing within AWWA specifications for a functioning meter.
16. Rebuilt the Newton Reservoir fill valve and updated lighting to LED in the valve vault.
17. A B-box locating program was started, going through each street alphabetically, looking to locate and update measurements of the location if needed. About 25% of the town was completed, with a goal of finishing the project by the end of 2020.
18. 25 water leaks (water main breaks, rotted tap saddles, service leaks) occurred and all were repaired with in-house staff.
19. Started year 1 of a 3 year project to have a contractor locate, operate and GPS all water system valves. This follows AWWA standards for water valve maintenance, helping ensure that valves are accessible and operational for emergencies and shutdowns.
20. Televised over 29 miles of sanitary sewer and another 1.5 miles of storm sewer main in-house and prioritized the maintenance and reconstruction needs of these mains, including lining. Cleaned over 8 miles of sanitary and storm line identified by televising. All portions of the sanitary system should be televised by the end of 2017, completing the 3+ year effort.
21. Completed 5,213 tasks and responded to 392 requests.
22. Cleaned and inspected 175 stormwater catch basins and inlets.
23. Responded to 74 sanitary sewer back up calls on residential lines and cleared 5 back-ups on Village owned sanitary mains.
24. Marked sanitary sewer, storm sewer and water main locates for 6,636 JULIE requests. This is 5.5% higher than the 5 year running average for the same time period.
25. 70 hydrants were repaired, replaced or installed; 16 water distribution main line valves repaired, replaced or installed; 4 lead water service lines replaced; 2 unused, old water services abandoned; 76 B-box repair replacements; 10 storm sewer structures rebuilt, 40 storm sewer structure repairs, 3 culverts replaced, 147 ROW and Building/Zoning Permits completed and 904 tons of spoil hauled out.
26. Training includes classes in water production plant operations, water distribution products, trenching and shoring, confined space entry, flagger training and NIMS/FEMA, Disaster Management for Water and Sewer Operations, and Water Operator Certification.

Division Goals for FY18

1. Continue to reduce the amount of non-revenue water in the LMO report. This will reduce overall water costs to the Village. Ways in which the division will work towards this goal is by: continuing to test residential meters in-house and large diameter meters with a contractor to ensure meter accuracy; continuing to repair water leaks quickly, helped by having a full complement of workers and equipment such as the leak correlator; investigation of accounted for but current non-revenue water use that could be billed for; leak detection in the Village to potentially identify leaks that are not surfacing; and other best practices for water loss conservation recommended by the American Water Works Association (AWWA).
2. Develop a maintenance plan and implement the program for necessary inspections and repairs of the Village's two reservoirs based upon the two recent inspections performed.
3. Complete the annual system wide flushing of fire hydrants in the spring and flushing of dead end hydrants a second time later in the year. Continue to flow test hydrants in the system, covering a representative sample on a 5 year, rotating basis to meet ISO requirements.
4. Clean and inspect 15% of all catch basins and inlets, with a goal of covering the entire Village on a 7 year basis, to keep us on track with the target goals of our MS4 permitting.
5. 2018 will be the biennial survey for Cross Connection Control devices, typically a reduced pressure zones (RPZs). These devices help protect the water system from backflow and back-siphonage. Notification will go out to all residents to help identify and track these devices in the Village that are required to be installed and tested annually by the IEPA and Illinois Plumbing Code. The Village will work with the contractor of the online tracking program to move compliance closer to 100% for annual testing.
6. In-house televising and cleaning of sewers will continue this year to reduce contractor costs for sewer inspections and maintenance. The Division televises mains associated with any sanitary sewer overflows. The effort this year will move towards the storm sewer system, looking to televise ~17.5 miles (25%) of storm sewers to complete this project in 4 years. Sanitary sewer televising will continue but at a lower amount, focusing on project and problem areas. Televising of the sewers allows crews to focus cleaning only on areas that need it, reducing the amount of water and employee hours needed for cleaning, while helping keep the Village's sewers clear and flowing. After the televising of the storm system is completed, the goal will be to annually televise and clean as needed, 15-20% of each system.
7. Complete year 2 of the 3 year program to have a contractor locate, operate and GPS all water system valves.
8. Perform the annual cleaning of the 5 storm sewer vortex separators locations (9 structures) in the Lake Ellyn / Riford Road storm sewer basin and the 5 Village owned lift stations.
9. Continue training new employees, as well as advancing the skills and knowledge of current employees to help with employee development.
10. Continue to monitor problematic sump pump discharge issues within Village Right of Way and help address these problem areas in the Village with the Private Property Drainage Improvements

Cost Share Program.

11. Building of a new storage facility at the Newton pumping station for water and sewer components that are needed for repairs and replacements to the water and sewer systems.
12. Starting a change-over of 7,000 existing touch pads to radio read registers for water meters, allowing for remote reading of water usage, improved customer service and increased information to help with monitoring system functionality.
13. Make repairs to pumps at South Park and Memory Ct. to extend the life of these stations until the projected replacements in the Capital Improvement Program.
14. Arc Flash analysis of electrical panels for the water and sewer facilities.
15. Finish necessary changes to equipment to be able to feed chlorine at North PAS and monitor with the SCADA system.
16. Run new wiring and conduit to allow generator run status to be tied to the SCADA system for the Newton Pump Station generator.
17. Rebuild one booster pump each at the Newton and Wilson pumping stations and implement preventative maintenance programs for those assets.
18. Continue to update the GIS maps of the water, sanitary, and storm systems. Needed changes will be documented by staff and updated by the GIS consultant as discovered. The goal is to make the necessary changes to the GIS and asset management software to allow crews to track sanitary and storm sewer televising and cleaning with mobile devices. This may be done in-house or require the use of an outside contractor to map the structures and gather the necessary data.

VILLAGE LINKS / RESERVE 22 – BUDGET

Facilities

The Village Links / RESERVE 22 operates 4 facilities on 280 acres. These facilities are incorporated into a sophisticated storm water detention system that detains 30% of Glen Ellyn's storm water and is a primary reason that the Village developed and operates these properties.

<u>27-Hole Golf Course</u>	
Village Links of Glen Ellyn	240 acres
<u>Passive Use Parks</u>	
Panfish Park	18 acres
Lambert Lake Nature Preserve	22 acres
Co-Op Park	1 acre

Village Green park (35 acres of athletic fields) is owned by the Village. Since 2003, it is operated by the Glen Ellyn Park District under a rolling 25 year lease. The Village Green does not impact this budget.

Budget Organization

The Village Links / RESERVE 22 has 3 operating divisions: Grounds, Golf, and RESERVE 22. The budget is divided into 7 accounting sections. Segregating expenditures by revenue center and by managerial responsibility allows us to monitor the financial performance of each revenue center and maintain managerial accountability for each line item.

<u>Grounds Division</u> Division Head: Golf Course Superintendent
<u>Responsible for Budget Sections:</u> 55 710 - Golf Course Grounds 55 740 - Stormwater Management 55 7x5 - Mechanical Maintenance for equipment and buildings in all Divisions
<u>Golf Division</u> Division Head: Director of Golf
<u>Responsible for Budget Sections:</u> 55 720 - Golf Services 55 750 - Pro Shop Merchandise 55 780 - Motorized Carts
<u>RESERVE 22 Division</u> Division Head: Executive Chef / Food & Beverage Director
<u>Responsible for Budget Sections:</u> 55 730 – RESERVE 22

Administration, 55700, includes line items not specific to an individual operating division, along with all capital expenditures and debt service.

Financial Overview

No tax dollars are used to maintain or operate Village Links/RESERVE 22, Lambert Lake, or Panfish Park. The Village Links / RESERVE 22 and Stormwater management operate solely from facility fees. Residents pay golf green fees at roughly a 40% discount off market prices.

Golf Course/Restaurant profits are used to subsidize resident use of the golf course, park maintenance and the maintenance and operation of the storm water detention system.

Financial Goals - Our financial goal is to be as profitable as possible. More specifically, our short-term goal is to generate enough revenue to cover operating expenses, \$650,000 per year in debt service, \$175,000 per year in capital replacement, and maintain adequate cash reserves to buffer against the whims of a weather dependent seasonal business.

Another major goal is to provide significant resident green fee discounts. In 2017, residents will receive roughly \$300,000 in discounts.

Debt Service - The fund is scheduled to make a \$340,000 annual debt service payment to retire bonds issued to fund the 2004 golf course renovation. The final debt service payment for that bond issue is due in 2023.

The fund is also scheduled to make a \$310,000 annual debt service payment to retire bonds issued to fund the 2013 expansion of the driving range, parking lot, and clubhouse. The final debt service payment for that bond issue is due in 2033.

The golf course has generated sufficient profits during every fiscal year of operation to fully cover all debt service. 2014 was the first full year of operation with the expanded clubhouse. Cash reserves of more than \$1,470,000 are available to cover any short falls, and to fund future capital projects. The cash reserves were accumulated from prior year profits.

Profit - \$5,850,000 in profits have been earned in the 12 years since the 2004 golf course renovation. Those profits were used to make \$4,645,000 in debt service payments, reinvest \$1,280,000 in routine capital equipment replacement, and boost cash reserves for future capital replacement needs.

Revenue - Nationwide demand for golf weakened after September 11, 2001, and fell even more sharply following the 2008 recession. Rounds played and golf revenues are relatively flat for 2017, as the decline seems to be leveling off.

The number of golf rounds played at the Village Links and resulting revenues have varied widely in recent years, with weather being the main variable.

Future golf revenues are uncertain. Golf demand is stagnant. Revenues are held down by significant price competition stemming from an excessive number of golf courses operating in the market. Most public courses in the market are not-for-profit, and are subsidized by tax dollars.

The expanded food and beverage business has generated additional revenue, but much of this new revenue is offset by increased expenses. The track record of golf course food service operations in DuPage County is uneven, with virtually every golf course clubhouse requiring tax dollars to cover debt service.

Expenses - Cost containment efforts started in 2002 have allowed us to remain virtually flat in golf operations expenses from year to year. This containment of operating expense has kept the golf course profitable in spite of declining revenues.

2017 has been a good fourth full year of operations. Despite some unusual challenges, facility revenues have increased 2%. While golf has been relatively flat for the period, food and beverage operations have shown a moderate increase, most notable in the banquet business. We continue to refine cost efficiency in RESERVE 22, which will lead to maximization of profitability. We expect to be able to cover all expenses, including the restaurant portion of the debt service.

Summary - The Village Links/RESERVE 22 is well positioned. The course is popular and has an active clientele. The physical plant and equipment are in generally solid condition, and the facility improvements added in 2013 have been well received by our guests.

Storm Water Detention System

The Village Links is a golf course and a storm water detention system. Built in 1966 and expanded in 1973, the storm water detention system consists of twenty-four interconnected ponds: one pond at Lambert Lake, two at Panfish Park and twenty-one on the golf course.

Rain water entering the system at the northwest portion of the system flows from pond to pond via a series of underground storm drain pipes for more than a mile before leaving the golf course for the DuPage River.

The storm water is slowed as it moves from pond to pond. Silt debris washed from streets and sidewalks settles in the ponds before it can pollute downstream rivers. The water stored in the detention ponds is used to irrigate the golf course. The golf course turf filters the mildly polluted storm run-off water, cleaning it before it replenishes the aquifers below.

Since 1966, Village Links' revenues have paid for the maintenance and operation of the storm water detention system. During the 2004 golf course renovation, \$350,000 was spent on the main system, including pond expansion, silt removal, pipe replacement, and shoreline stabilization. In 2013, the capacity of the storm water detention system was increased to accommodate the expanded clubhouse. A pond was expanded, several acres of property were lowered, and new lake connector pipes were added at a cost of \$200,000.

Shoreline Stabilization - The storm water detention system has 6.4 miles of shoreline. Wave erosion causes the lake banks to fall into the water, increasing the water surface and reducing the water depth. Shoreline stabilization efforts initiated in the 1970's and 2000's have been effective.

Shoreline - Village Links Ponds	- 4.9 miles
Shoreline - Panfish Park Ponds	- 1.0 mile
<u>Shoreline - Lambert Lake</u>	<u>- .5 mile</u>
Total Shoreline	6.4 miles

Silt Removal - Silt removal is a potentially significant expense over the next 20 years. Disposal of detention pond silt is expensive because concentrations of metals and fuels dropped onto roads by vehicles require that it be treated as a hazardous material.

Drain Pipe Replacement - Many of the original corrugated metal pipes that connect the golf course ponds were replaced in 2003. The new drain pipes (concrete or composite plastic) should last indefinitely.

Control Structure Replacement - Three concrete control structures are in fair condition for their age and will not be prohibitively expensive to replace in another 25-35 years.

2017 REVIEW

2014 was the first full season of operations in the new facility. We were able to cover our debt, execute some capital needs, and make a small contribution to our cash reserves. This was particularly challenging due to significant changes in key management positions. By contrast, 2017 will be a profitable year for both golf and food services. Revenues are up, slightly in golf, and more significantly in food and beverage services. The community seems to have warmed to the facility, as community groups are increasingly booking events at RESERVE 22. Most of the earlier service challenges have been met, and the facility is well on its way to another profitable season.

Grounds (Golf Course Maintenance)

Following a wet and cool spring, in which we aerated greens for the first time in many years, we began to see warming and drying out in July and August. Still, greens took longer to recover from the aeration process than expected. Along with the sub-par weather, this hampered already unreliable spring revenues. However, aggressive top-dressing and fungicide applications returned the golf course conditions to the fast, firm, and lush conditions our customers have come to expect.

Golf

Rounds of golf have remained relatively flat for the past three years. Extensive golf programming, in the form of nightly golf leagues, junior and adult lesson programs, and a variety of public events, keeps the Village Links as one of the busiest in the area. The recently expanded driving range has accommodated more patrons, as they appreciate the improved turf conditions.

Since we began accepting golf outings in 2008, our business and reputation have grown at a steady rate. In 2017, we hosted 99 golf outings. Many of our outings are less than 50 players, as groups struggled to fill their events. Still, golf outings improve our dollars per round, and offer advantageous exposure to many who are visiting for the first time. The Blue Heron Room has proven to be a good selling point, as many events take full advantage of the banquet facilities, and adjoining patio. The US Soccer Federation conducted a Foot Golf outing for the second consecutive year, and the American Foot Golf League hosted two qualifying events for its inaugural National Championship. Foot Golf generates about \$10,000 annually, with minimal associated costs.

Golf staff introduced PGA Jr. League golf in 2014. The initial summer league attracted 60 participants, and provided over \$10,000 in additional revenue, notably in green fees and driving range. In the past three seasons, the summer league filled with 72 participants, while the added fall league attracts around 40 juniors.

Pro Shop

Revenues from Pro Shop sales have little impact on the bottom line, as there is a high variable cost associated with the sale of merchandise. It is very difficult to compete with the big box stores, who can offer a wider variety at more attractive prices. We are continuing with an inventory reduction plan, which will focus on carrying mostly products with a higher turn rate, such as gloves, balls, and apparel, and reduce products with a long shelf presence, like golf clubs and other equipment.

Food and Beverage

Revenues

The popularity of RESERVE 22 continues to increase among Glen Ellyn residents, as well as nearby communities. The business has increased consistently, month to month, in each of the four main profit centers over calendar year 2014. Restaurant revenues took a hit in 2017, with the poor weather conditions of April, May, and June, hampering the attractiveness of outdoor dining, showing a relatively flat 2% decrease. The banquet business, however, continues at a steady, but slowing, growth rate of 15%

Expenses

The most challenging expenses to cover in the Food and Beverage operation is the business' prime cost, consisting of product costs plus payroll. With ever rising food costs, menu construction and pricing will continue to be a main focus. While all businesses struggle to comply with Affordable Care Act regulations, municipally owned facilities have the added challenge of managing pension regulations for its core staff. Limited available hours contribute to higher turnover, inconsistency in service levels, and training expenses. In addition, the Department of Labor is likely to impose an overtime expansion rule which will affect the way we compensate our management team. Exploring staffing alternatives, such as outsourcing labor, proved undesirable, as these types of arrangements carry high service costs, which negate the offset of pension, or overtime costs. Controlling prime costs will be a major component to continued profitability.

Debt Service

In 2002, the Village Links/RESERVE 22 Fund borrowed \$4,500,000 through a 20-year general obligation bond issue to help finance the golf course renovation. In November 2010, a bond refinancing was conducted to restructure this debt and take advantage of lower interest rates. Interest rates for this bond issue are 2% initially and top out at 3.9%. Annual principal and interest payments remain unchanged at about \$340,000. The bulk of the savings, about \$225,000, will be realized at the end of the issue, with a reduced final payment on January 1, 2023.

In October 2012, the Village Links/RESERVE 22 Fund borrowed an additional \$5,000,000 through a second 20-year general obligation bond issue, to help finance the new restaurant, bar, banquet room, and driving range. Interest rates for this bond issue are 2% initially and top out at 2.5%. Annual principal and interest payments are about \$310,000. The final payment on this bond issue will be made on January 1, 2033.

PREVIEW 2018

It will be a challenge to cover the debt service that funded these improvements with revenues generated from the facility. Every publicly owned golf course clubhouse built in the last 25 years in DuPage County has been supported with tax dollars. We are committed to retiring all of the related debt service with Village Links / RESERVE 22 operating profits. It is expected that it could take a few years for the business to mature so we can take full advantage of all of the opportunities of the newly configured Village Links. In the meantime, golf course cash reserves will ensure that debt payments are made without the use of tax monies.

Golf profitability will continue to be the key factor in the financial success of the Village Links. Green fees, cart fees, and driving range revenues will generate the bulk of the gross profits necessary to cover the outstanding debt service.

Food service is playing a much larger role than in the past. Food service revenues will continue to grow, as banquet sales and catering will contribute. Food Service will generate a significant amount of the gross profits required to cover the debt service.

The Village Links faces diverse competition from area golf courses. Many courses, desperate to generate cash flow, are offering green fees below their break-even point. Less drastic changes are expected from courses owned by local governments, many of whom subsidize golf like they do swimming pools and skating rinks. Some governments are getting out of the golf business, bringing in management companies that lower costs and/or services to the commodity level. At the other end of the spectrum, private clubs are dropping guest fees, member dues, and outing fees to compete with high end public courses.

The Village Links remains an excellent golf value due to superior course conditions and layout. Successful programming strategies and green fee specials outside of prime time help keep the course busier than most others in the area.

Primary Initiatives for 2018

Grounds

We must continue to be a great value in golf, by offering consistently superior playing conditions, as demanded by the golfing public. This must continue to be done efficiently, as revenues will dictate the amount of resources available to maintain the optimal conditions. Our full-time staff members are trained in all areas of golf course and grounds maintenance, and having five full-time members will ensure continuity and consistency.

Golf

Programmed Golf - We will continue to offer an exceptional amount of programmed golf at the Village Links in 2018, including leagues, tournaments, and instructional schools and classes. The upkeep of these events is crucial in guaranteeing a consistent revenue flow. We will also look for new revenue streams, such as Foot Golf, introduced at the end of 2014, to increase profitability.

Course Maximization - We will continue to try to maximize golf course utilization. The Golf Division has the job of scheduling the proper number of tee times, filling the tee times, getting the customers in those tee times started on time, and helping them move around the course in a reasonable amount of time. This is particularly crucial when we book smaller outing groups, who choose a shotgun start. The challenge is that over the years, with the increased distance golf balls are travelling, golf course capacity has been reduced. While we have historically teed off eight groups per hour, it is difficult now to tee off seven groups per hour.

Online Tee Times - Providing our guests 24/7 access to online tee times has been a popular addition. The use of this system is growing at a slow, but steady, rate. Our goal is to maximize the ease in which golfers can book our course. The electronic tee time system will help us automate communication with guests who have made tee time reservations.

Golf Outings - We must continue to increase the size and number of golf outings held in 2018. Marketing efforts conducted in 2014 and over the winter months has built a strong base of returning outside events. We will continue to look for ways to raise the revenues, by looking to offer more value added services. We will continue to build a reputation in the area as conducting professional, well run events. We must be conscious of the number of outings we book each year, so as not to alienate our regular customers and resident golfers, while maximizing profits.

Food & Beverage - RESERVE 22

Our new facility offers a variety of products to maximize revenues. We will continue to market and build RESERVE 22 as a destination restaurant that does not rely primarily on golfer traffic for its profits.

Staffing - We look to fine tune staffing levels to match seasonal sales volume and lower our labor cost as a percentage of revenue. Hiring the right people in key positions will assure us of providing outstanding service levels. We will be challenged by the prohibitive costs and restrictions of the IMRF pension program, and ACA.

Bar & Restaurant - We will continue to operate RESERVE 22 as a major bar and restaurant destination for lunch and dinner. We offer popular TV sports packages in the bar and live entertainment on weekends.

Banquet Room - The 150 guest Blue Heron Room is available for golf outing banquets and non-golf private parties. This room is also used for overflow dining when available. Special brunches are planned for Easter, Mother's Day and Father's Day. One key factor in our success will be to make good use of our banquet and meeting rooms. Keeping those spaces productive will increase our profit percentages, as parties and meetings generally carry a lower overall variable cost as a percentage.

Board Room - The Board Room is available for groups of 8-20 that combine meetings with golf and a meal or for stand-alone meetings.

Stormwater Management

This budget provides \$38,500 to maintain three Village parks: Lambert Lake Nature Preserve, Co-Op Park and Panfish Park. These parks are part of the Village Links storm water detention system. Included

in the maintenance of Panfish Park is maintenance of walkways that run through the Waters Edge Condominium Association and connect to the park. Also included are new maintenance requirements with the addition of the new police station at Panfish Park.

Throughout the years, Village Links revenues have paid for over \$1,000,000 in park maintenance. Staff will continue to collaborate with the Public Works Department to maintain these parks, and make improvements as necessary.

Capital Projects

Our goal is to earmark \$175,000 annually for routine capital projects and equipment replacement. In 2018, \$169,000 is budgeted in capital expenditures.

While we have extended some equipment beyond their useful lives, our equipment and physical plant are in acceptable condition. If revenues permit, it will take most of the coming decade to get our equipment replacement program back on schedule.

IMRF - Retirement Fund Contributions

The employer portion of retirement fund contributions budgeted for 2018 is \$146,151, 10.34% of total regular wages. We have added a significant number of employees to IMRF in Food Services, in order to increase service consistency and minimize training costs and turnover.

Personnel Costs

The Department of Labor expanded the overtime regulations, which will re-define exempt status. This will have a significant impact on how we compensate our restaurant managers.

We will continue to attempt to minimize our exposure to state unemployment benefit claims. We cannot control those costs, but we can influence them through a variety of means including helping seasonal staff find other employment in the off season.

Proposed increases to the minimum wage will impact our cost for hourly employees. This will have a significant impact on Food and Beverage, and Golf. It will have a lesser impact in Grounds.

2018 GOALS

We have six major goals for 2018:

- 1 - Pace of Play** - Have play move at a faster pace at the Village Links than at any comparable public golf course in the Chicago market. Improve customer awareness of their pace of play and our efforts to assist them on both the 18-hole and 9-hole courses.
- 2 - Course Conditions** - Maintain the 18-hole course in superior condition. Maintain greens that are smoother and faster than those at most public golf courses.
- 3 - Revenue Growth** - Rebuild golf revenues.

4 - Continue to Build the Food Service Business Increase restaurant, bar and banquet business that generates \$2,500,000 in annual revenue.

5 - Constrain Expenditures - Constrain expenditures to match revenues, without customers noticing the cutbacks.

6 - Generate Profit - Generate a gross profit to cover \$650,000 in debt service and \$169,000 in capital replacement.

Key Performance Indicators - We track the following Key Performance Indicators. Target performance levels are identified.

Total Revenue - \$5,500,000

Rounds Played - 72,000

Golf Revenue (Green Fees, Motor Carts, & Driving Range, & Pro Shop) - \$3,000,000

Food Service - \$2,500,000

Controllable Food Service Expenses - Wages for seasonal / part time employees is 28-29% of revenue. The cost of products for resale, including beer / wine, food, and beverages, is a combined 33% of revenue. Prime Costs total 68-72% of revenues.

Keep Pace - 80% of golfers Keep Pace

On Time - Be on time (within seven minutes) for 90% of all rounds.

Stimpmeter (weekly) - Average 10.0, minimum 9.0 feet April 15 - November (9-hole course 1.0 foot slower).

PARKING FUND

The Glen Ellyn Parking Fund is an enterprise fund that is comprised of fourteen parking lots in downtown Glen Ellyn. These lots provide multiple parking options for commuters, residents, employees and patrons of Glen Ellyn. The Downtown Glen Ellyn Parking Map provides a key to the different parking options, both on street parking and parking lots. Revenue is derived from leased parking lot fees (mostly commuter lots owned by Union Pacific), daily lot fees (Duane/Lorraine), and coin collection from parking meters. Glen Ellyn currently leases one parking lot that has free 3 hour public parking (old McChesney/Miller lot). The revenue from the parking lots provides for maintenance (sweeping, patching, line striping, meter maintenance, landscape, flowers, mason repairs, etc.) as well as capital projects (resurfacing, reconstruction, signage, pay boxes, etc.).

RESIDENTIAL SOLID WASTE FUND

The Residential Solid Waste Fund was established in 1981, after the Village Board decided to contract with one hauler for single scavenger service for the entire community, in place of each property owner making their separate refuse collection arrangements with different refuse collectors. It identifies the cost of providing once-a-week solid waste collection and disposal services to the approximately 7,400 single family residences in Glen Ellyn (the Village refuse contract does not include commercial or multi-family housing units).

The Solid Waste Fund is a stand-alone enterprise fund which means that adequate revenues must be produced through direct billing to users (included as a separate service charge on the monthly Village utility bill) and through other revenues, such as the sale of recyclable materials, to cover the cost of this service. No tax dollars are used or are required to help pay for the expenses of this program.

The Village Manager's Office is primarily responsible for the oversight of this contract service and Fund, while the billing and collection function is handled through the Finance Department. This Fund also handles the financing for the once-a-month parkway branch and brush removal program from May through October. Additionally, reserve funds are accumulated to cover the on-going replacement costs of damaged garbage or recycling containers, and to help fund post storm/flood debris curbside collections that may arise in emergency situations.

Following an extensive competitive Request for Proposals process in early 2012, the Village signed a 5-year agreement with Republic Services for refuse and recycling curbside collection services. The contract provides for weekly collection on Mondays, including yard waste collection from April through November of each year. The annual clean sweep curbside collection was reinstated as part of the new contract and is budgeted for in 2018. The new contract also includes continuation of a curbside composting program, which was started in 2016.
